

## LK-MS543-1R Single Channel Self-Resetting Mechanic Switch

## LK-MS543-1L Single Channel Self-Locking Mechanic Switch

LK-MS543-1R

LK-MS543-1L

### Feature

- Special contact materials with a maximum carrying current of up to 10A
- Double-pole double-throw three-position switch to control motor Forward/Stop/Reverse
- LK-MS543-1R is self-resetting switch. When the button is pressed, and after the release, the button rebounds and the circuit is disconnected
- LK-MS543-1L is self-locking switch. when presses the button, the button does not rebound after being released, and the circuit is continuously turned on
- Single channel control, standard US regulations, easy for installation

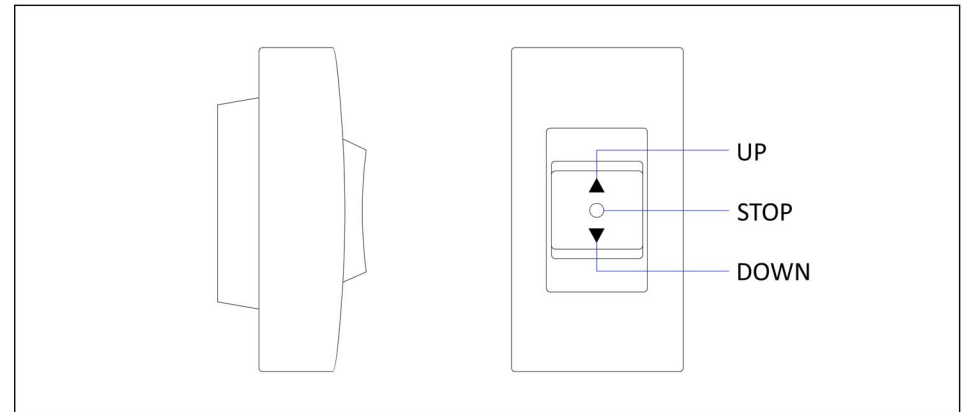

### Application

- Mechanical manual switch is suitable for tubular motor, electric window opener, automatic door closer
- Can realize manual control of motor UP/STOP/DOWN, simple operation and reliable performance

### Specification

Model	Channel	Reboundable	Working Voltage	Maximum Current	Working Temp	Size
LK-MS543-1R	1	Yes	AC100-240V	10A	-20°C ~ +55°C	85*41*43mm
LK-MS543-1L	1	No	AC100-240V	10A	-20°C ~ +55°C	85*41*43mm
