

#### Feature

- DC24V safe voltage
- Push/Pull force 600N or 1000N optional
- Wiring from bottom
- Ideal for heavy duty window
- Simple but delicacy design, low noise operation
- Sandblasted oxidative surface treatment
- Built-in over current protection
- Life span 10,000 opening and closing movements

### LK-L36B Electric Linear Actuator

#### Electric wiring

#### Single actuator control

## Synchronized actuators control

#### Application

- LK-L36B linear actuator can be used in smoke removal, natural ventilation, smart home, outdoor shaded, sun room
- Applied to a variety of windows, awning window, skylight, especially ideal for shutter, louver and heavy duty windows

#### ■ Installation Reference

- Installation of LK-L36B is flexible, can be installed on different positions by suitable bracket
- To control one window by two actuators you have to need a synchronizer

#### Installation notice

- The actuator must be installed by professional technician
- Before installing, make sure the actuator is matching with the window
- Actuator cannot be installed outside directly
- Actuators don't have anti-pinch function, be careful when installing or using
- The power supply of actuator must comply with the power of DC24V/3A
- Between actuator and main power supply must be a switch to cut power off
- Making sure that power is off before powering actuator on
- Be careful when installing the actuator, avoiding the window closed accidentally causing
- Do not disassemble the internal parts of the actuator, if unusual please contact supplier
